

1941.

WESTERN AUSTRALIA.

Quarterly Statistical Abstract

(The preliminary figures published in this Abstract are, as far as possible, revised every quarter. Those which appear in this issue consequently supersede any contained in previous issues.)

No. 302.

To 30th June, 1941.

Compiled from Official Returns.

R. J. LITTLE,
Acting Government Statistician.

PERTH:

BY AUTHORITY: FRED. WM. SIMPSON, GOVERNMENT PRINTER.

1941.

1. Geographic Distribution

Geographic distribution is the spatial arrangement of a species in a particular area. It is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

Geographic distribution is often used to describe the range of a species, which is the area where a species is found. The range of a species can be described in terms of its geographic distribution, which is the area where a species is found.

XIV.—WAGES.

No. 39—State Basic Wage.

Under the provisions of the Industrial Arbitration Act, 1912-25, authority was vested in the State Court of Arbitration to declare an annual Basic Wage operative as from the 1st of July each year.

The first decision of the Court took effect on the 1st July, 1926, and prescribed a rate of £4 5s. 0d. for males and £2 5s. 11d. for females throughout the whole of the State.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. 0d. and £2 7s. 0d. respectively, with the exception of certain specified goldfields areas, in respect of which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage of £4 6s. 0d. for males and £2 6s. 5d. for females, in respect of the Metropolitan Area, and rates of £4 5s. 0d. and £2 5s. 11d. respectively for all other parts of the State.

Additional power was given the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the annual declaration, and on the 3rd March, 1931, rates of £3 18s. 0d. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, while all other parts of the State were fixed at £3 17s. 0d. and £2 1s. 8d. respectively.

The annual declaration operative as from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a different wage for agricultural areas, which are taken to be those areas comprised within the official South-West Land Division as gazetted under the Land Act.

Wage levels in all divisions of the State were considerably increased as from the 1st July, 1938, following the most comprehensive inquiry since the original declaration. In the course of the 1938 inquiry, special consideration was given to the factors of National Income and Standard of Nutrition.

The table hereunder shows annual declarations and interim variations since the original decision of 1926, which remained unaltered until 1st July, 1929.

Annual Declaration.

† Relates to certain specified Goldfields Districts only.

(a) Defined as the area comprised within a radius of 15 miles from G.P.O., Perth.

(b) Rates for divisions shown not specifically declared by Court. (See letterpress.)

No. 40.—Minimum Rates of Wages payable under Awards of Courts of Arbitration and Industrial Agreements, in certain Industries and Occupations as at 1st July, 1941.

Rates relate to the Metropolitan Area except where otherwise stated, and are shown to the nearest farthing.

Industry and Occupation.	Wages.	Industry and Occupation.	Wages.
CLASS I.—TREATMENT OF METALLIFEROUS MINE AND QUARRY PRODUCTS—		CLASS III.—CHEMICALS, DYES, EXPLOSIVES, PAINTS, OILS, GREASE—	
Cement Pipe Making :	Per week.	Oil Handling :	£ s. d.
Pipe Maker	4 17 0	Adults	Per hour.
	to		0 3 0½
	5 0 0	Soap and Candle Factories :	Per week.
Stone Crusher	4 17 0	Glycerine Hand	4 18 0
Labourer	4 11 0	Leading Candlemaker	4 17 0
Cement Works :		Boxmaker	4 17 0
Miller	5 1 11	Soap Crutcher	4 15 0
Assistant	4 15 11	Storeman Packer	4 14 0
Burner	5 11 11	Soda Crystal Maker	4 14 0
Dredge Hand	5 7 11	Tallow Man, Box-wirer, and Soap Cutter	4 13 0
General Hands	4 12 11	Assistants to Soapmaker and Candle- maker	4 13 0
	to	All other Adults (Males)	4 8 0
	5 0 11	Wrappers and Packers (Adult Females)	2 12 0
Fibrous Plaster, Plaster, and Cement Goods :		Superphosphate Works :	
Bench Hand	5 18 6	Phosphate Rock Section	4 12 6
Fixer	5 18 8		to
Sheet Fibre Casters	4 18 0		5 1 6
Reinforced Concrete and/or Pressed Cement Worker	4 18 0	Sulphur Section	5 1 6
Limeworks :			to
Cutters, Loaders, Kiln Hands, and Quarrymen	4 17 0	Superphosphate Section	5 7 6
	to		4 12 6
Horse Drivers	4 17 6		to
	5 2 6	Sulphuric Acid Chamber Section	5 1 6
Motor Drivers	5 2 6		4 15 6
	to	Acid and Chemical Manufacturing Plant Section	5 1 6
Day-firers, Powder Monkey, Lime Baggers, and Crushers	5 3 0		4 12 6
Kiln Repairers	5 6 0	Mixed Manures Plant Section	5 1 6
Night Firer	1 3 6		4 12 6
CLASS II.—BRICKS, POTTERY, GLASS, ETC.—		General Section	5 4 6
Brickworks (Hoffman Kilns) :	Per week.	CLASS IV.—INDUSTRIAL METALS, MACHINES, IMPLEMENTS AND CONVEYANCES—	
Burner	5 9 0	Agricultural Implement Making :	
	4 15 6	(1) Government :	
Clayhole Hands	to	Boiler-maker	5 18 0
	5 1 6	Pattern-makers	6 7 0

XV.—METEOROLOGICAL STATISTICS.

(Supplied by the Acting Director of the Commonwealth Weather Bureau, Mr. H. W. Warren.)

WEATHER NOTES.

No. 41.—Notes on the Rainfall and general weather conditions in Western Australia during the months of April, May and June, 1941.

April.—The rainfall in Western Australia in April was considerably above normal in the southern half of the State and in the West and the East Gascoyne Divisions, the surpluses over the various divisions as a whole ranging from 163 per cent. in the North Coastal agricultural region and 186 per cent. in the Wiluna district to 21 per cent. in the southern agricultural districts.

In all divisions of the Tropics, however, the month was drier than is usual in April. The Fortescue Division experienced a rainless month and in the East Kimberley and North Kimberley Divisions only light showers occurred, but rainfall totals in the De Grey Division and in the West Kimberley averaged 50 points and 92 points respectively.

In the pastoral areas south from the Tropic the least satisfactory conditions prevailed in a rather large area bounded on the east by Three Rivers and Peak Hill, but some good rains occurred in the more westerly parts of the West Gascoyne Division; and Carnarvon received 201 points.

The Northern and Southern Coolgardie Goldfields regions also fared well, as a result of widespread and rather frequent thunderstorms which extended to the Wiluna district also. The principal rains in the eastern and north-eastern pastoral areas were 468 points at Malcolm, 390 points at Kookynie, and 366 points at Wiluna.

In the wheat-growing districts the season has opened favourably, particularly in the North Coastal agricultural region, where the falls averaged 221 points. In the more inland sections of the wheat-belt the month's rainfall totals average 154 points in the north and 126 points in the south. The outstanding registrations in the wheat-belt were falls of 371 points at Morawa, 341 points at Latham, 335 points at Nangatty and 322 points at Perenjori.

In the dairying districts the rains were heavy and have been followed by a good growth of green pasture. 503 points at Pemberton was the principal rainfall registration in the south, but more than three inches were recorded in a coastal belt extending from Albany to Perth.

Temperatures during the period showed few marked departures from the normal but, during a few short periods of cold clear weather, fogs were rather numerous in the south. No frosts were reported.

The extremes of temperature in Perth were 88.8 degrees on 9th April, and 45.7 degrees on 16th April. The mean maximum temperature (74.6 degrees) was 1.6 degrees below normal and the mean minimum temperature (55.4 degrees) was 0.9 degrees below normal.

The following table shows how the rainfall in the various divisions as a whole compared with the respective normals:—

Division.					Mean for April, 1941.	Average Mean for April.	Percentage departure from Average Mean.
					points.	points.	%
North Kimberley	33	83	60 below
East Kimberley	17	83	80 "

Central South	126	104	21 "
Eucla	98	67	46 "
South-Eastern	147	86	71 "
North-Eastern	366	128	186 "

May.—Rainfall was distributed rather more unevenly than is usual in May, but, on the whole, the month's rainfall may be regarded as fairly satisfactory.

In the south-western districts the Central North Division received a moderate surplus as compared with the normal May rainfall, but elsewhere in the south-western quarter of the State the shortages over the various divisions as a whole ranged from 13 per cent. in the North Coastal agricultural region to 36 per cent. in the southern agricultural district and 37 per cent. on the Central Coast.

Although the month's registrations at many places in the agricultural areas were below normal, the amounts actually received were nevertheless substantial, and were probably sufficient for current seasonal requirements, except possibly as regards the South Central Division, where the average total received (140 points) was the lowest in the south-western divisions.

Further south, however, the rainfall was almost as heavy as usual, and in the South Coastal Division the totals averaged 394 points. The heaviest falls at individual stations were 596 points at Donnybrook, 587 points at Pemberton, 544 points at Greenbushes, and 518 points at Mundaring.

In the pastoral districts the outstanding feature of the month's weather was the considerable and unseasonable rainfall in the Kimberley Division, and particularly in the west of that region, the month's totals including 371 points at Anna Plains, 305 points at Broome, 288 points at La Grange Bay, and 285 points at Derby. In the inland area Hall's Creek received 244 points.

The month's rainfall in the tropics was derived from rather shallow but persistent tropical depressions operating on the north-western edge of large anti-cyclonic formations, which at times covered nearly all Australia.

In the southern districts the rain-producing depressions were of the ordinary "southern" type, with, at times, their rain-productivity augmented by an inflow of tropical and sub-tropical air.

Temperatures during the month were mostly above normal in the northern half of the State, but night temperatures at most places in the south were below normal, with the result that frosts were frequent and fairly severe in the southern inland districts. The lowest individual temperature readings were 28 degrees at Collie on 25th, Bridgetown on 25th and 26th, and Wandering on 25th.

In Perth maximum temperatures averaged 71.3 degrees and minimum temperatures averaged 53.2 degrees as compared with May normals of 68.9 degrees and 52.8 degrees respectively.

The following table shows how the rainfall in the various divisions as a whole compared with the respective normals:—

Division.	Mean for May, 1941.	Average Mean for May.	Percentage Departure from Average Mean.

Eucla	35	93	62 "
South-Eastern	115	116	1 "
North-Eastern	123	98	26 above

June.—The rainfall in Western Australia during June, 1941, was rather irregularly distributed, but the falls were above normal in the agricultural districts, and on the central and south coasts (except as regards some moderate deficits, chiefly in the South Central Division), and the seasonal outlook in the south-western quarter of the State may be regarded as highly favourable.

Over the various south-western districts as a whole the average amounts received ranged from 685 points on the Central Coast to 230 points in the Central North Division. The rains in the north-eastern wheat-belt were 36 per cent. above normal, and the smallest district surplus in the South-West of the State was 10 per cent. in the Central South Division. Unseasonable rains of more than two inches occurred in the East and West Kimberley Divisions but a moderate deficit was registered in the Gascoyne and South-Western areas, the Wiluna district received less than half the normal rains, and the Fortescue Division experienced a rainless period.

The heaviest rains occurred in a narrow belt extending from Brunswick Junction (1,381 points) through Pinjarra (1,003 points) and Jarrahdale (1,176 points) to Mundaring (1,032 points). Elsewhere the heaviest rains occurred at Pemberton (934 points) and Donnybrook (913 points), but more than seven inches of rain were received on the coast from Cape Leeuwin (836 points) to Greenough (665 points).

On the inland side of the Darling Range more than three inches of rain fell at most places west from a line joining Mullewa, Ballidu and Trayning, and in the district which included Merredin, Kellerberrin and Bruce Rock, but farther south falls exceeding three inches were limited almost entirely to the westward of the Albany line.

Eastwards from a line joining Hyden, Lake Grace and Ongerup the rainfall totals were less than two inches. Perth received a total of 816 points as compared with the June normal of 707 points.

The rainstorms which operated consisted chiefly of tropical depressions which formed on the north-western edge of vast anti-cyclonic systems and, moving southwards along the west coast, co-operated with southern depressions centred near the south coast. These disturbances produced copious rains in the limited areas in the south-west quarter of the State but their rain productivity was lessened rapidly as they moved eastwards, and their weakness in this respect was more marked in the southern agricultural districts than in the central and northern wheat-belt.

A feature of the month was the severity of several storms on the central coast.

In the metropolitan area some damage was caused in the Cottesloe-Mosman district on 9th June by wind gusts estimated at 70 m.p.h. Other storms in Perth caused wind gusts of 63 m.p.h. on 15th June and 53 m.p.h. on 25th June.

Due to the widespread and frequent rains with an attendant prevalence of cloud the month's temperatures were mostly mild, particularly at night. In Perth the extreme registrations were 71.8 degrees on 22nd June and 43.7 degrees on 8th June. The mean maximum temperature, 65.9 degrees and the mean minimum temperature, 52.2 degrees, were respectively 1.8 degrees and 2.6 degrees above normal.

The following table shows how the rainfall in the various divisions as a whole compared with the respective normals:—

Old	5,739	3,868	38	807
Total	5,775	3,888	38	813

No. 54.—Mid-Monthly Employment.

A.—FACTORIES.*

Index numbers showing the trend in Factory Employment since 1931.

(Base: Mean Employment in 1928-29, viz., 19,799, = 100.)

Year	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Annual Mean
1931	62	60	61	62	63	65
1932	60	63	67	68	66	64	66	66	67	71	72	73
1933	72	73	73	74	70	70	71	73	74	76	78	80
1934	78	79	80	81	80	78	78	80	82	85	86	87
1935	87	88	87	88	88	88	*94	95	97	99	101	102
1936	101	102	104	104	104	103	106	106	106	108	109	111
1937	110	110	110	109	109	108	106	108	109	111	112	113
1938	111	112	114	113	112	111	110	111	111	112	113	113
1939	111	112	112	111	112	110	108	108	109	110	111	112
1940 (a)	110	111	112	111	111	110	109	109	111	111	113	114
1941 (a)	113	116	117	117	118	119	119	119

* It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

(a) Indexes after June, 1940, are based on sample returns and are subject to revision.

B.—RETAIL ESTABLISHMENTS.

Index numbers, showing the trend in Retail Employment, compiled from returns specially collected from 67 representative establishments.

(Base: July, 1933 = 100.)

Year.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Annual Mean
1933	100	93	93	93	96	106
1934	108	99	98	100	101	100	104	102	100	104	104	103
1935	109	103	105	103	106	107	111	105	106	106	109	108
1936	114	110	110	109	111	109	113	111	113	116	116	113
